# Website Discussion

1. Are you able to find information that is relevant to your hypothetical report/presentation?
  - a. If so, how easy/difficult is it to find the information?
  - b. If the information is on the website but difficult to find, how might its accessibility be improved?
2. If information you seek is not on the website, for what are you searching that would be relevant to your constituency/ies?
3. As you look at your own state's Index page:
  - a. Is the data easily accessible and understandable? What could improve the presentation of data?
  - b. Does the narrative provide clear and useful information? How might it be improved?
  - c. Are the data and narrative presented in ways that would engage your constituency/ies? How might the presentation be more inviting for different kinds of stakeholders?
